- CE Course: Dr. Clarence C. & Maxine Davis Cottrill Endowed Lecture Presents:
  Pharmacological Implications in Dental Practice
Dr. Clarence C. & Maxine Davis Cottrill Endowed Lecture Presents: Pharmacological Implications in Dental Practice

Dr. Herschaft received a BA degree from Queens College - City University of New York, a DDS from West Virginia University (WVU) School of Dentistry, a certificate in oral and maxillofacial pathology from the Medical University of South Carolina (MUSC), and an MA in Curriculum and Instruction from the University of New Orleans. He is an Emeritus - MUSC College of Dental Medicine, Professor of Biomedical Sciences - University of Nevada - Las Vegas School of Dental Medicine, and Guest Professor - Nankai University Medical School in Tianjin, China. Dr. Herschaft is a forensic dentist with the Clark County, Nevada Office of the Coroner/Medical Examiner. He has been a vice-president of the American Academy of Forensic Sciences (AAFS) and president of the American Society of Forensic Odontology. Dr. Herschaft was designated a Distinguished Alumnus of the Year by the WVU School of Dentistry Alumni Association in 1998 and has been recognized by several national organizations and state agencies for his forensic dental services. A Diplomate of the American Board of Oral Medicine and Forensic Odontology and Fellow of the American and International Colleges of Dentists, AAFS and Pierre Fauchard Academy; he has published and presented extensively in the United States and abroad regarding oral and maxillofacial pathology, oral medicine, and forensic dentistry.

COURSE DESCRIPTION/TARGET AUDIENCE
This course, recommended for the entire dental team, will provide lecture information concerning patient history gathering. Emphasis will be placed on the association of the 40 most prescribed medications, over-the-counter drugs (OTCs) and herbal products with major disease categories that may influence dental treatment. An in-depth review of adverse drug events (ADEs), drug interactions, cost effectiveness and drug efficacy is stressed. Systemic drug therapies and medications used in the management of infection and pain will be presented. Current protocols for antibiotic prophylaxis and the therapeutic treatment of common oral mucosal lesions will also be discussed.

COURSE OBJECTIVES
Following this course, participants should be able to:
• Know the 40 most commonly prescribed medications in the United States including indications for administration, class or mechanism of action and ADEs.
• Understand the importance of categorizing medications generally.
• Relate the administration of commonly prescribed medications to systemic diseases requiring their use.
• Appreciate the significance of interactions among common prescription, over-the-counter (OTC), herbal medications, and certain foods that may alter or influence dental treatment.
• Know the commonly prescribed OTC, non-narcotic and combination analgesic drugs used to control preoperative and postoperative dental pain.
• Know the current American Heart Association (AHA) guidelines for antibiotic prophylaxis coverage.
• Know the therapeutic treatments indicated for common oral mucosal lesions.

DISCLOSURE
All those in a position to control content of this program have indicated that they have no relevant interests to disclose.

CREDIT
This course, sponsored by the WVU School of Dentistry and Alumni Association, has been approved for 7 dentistry continuing education hours.
